Managing drawable resources

The icon in the launcher view

Contents of app_notes.png
The XML text is updated automatically

Getting it wrong: editing the XML

The bug shows up in the resources view

Oh dear

Oh no, Java problems . . .

“Layout cannot be resolved . . . ”
R.java is generated so clean the project?

R.java is regenerated but errors remain

No good. Delete R.java and try again?

No good. What now?

Close the project and reopen it?
Reopening the project. Praying ...

Didn't work :-( but look at this ...

Moving the folder fixes the problem :-)

Moving the folder fixes the problem :-)

Layout shouldn't be in the drawable folder.

Parent of layout should be res.
