By the end of this lecture, you will have begun to

• recognise the main features of academic writing.

• recognise how to establish clarity in your writing.

• develop an awareness of how to write coherent text.
• You might want to check your own writing as we go through the following points.
With a partner discuss

What makes academic writing ‘academic’?
Academic writing is

• concise
• precise
• clear
• coherent
Good writing is simple and direct.
How to avoid wordiness

1. Omit needless words (ineffectual phrases, excessive hedging).

• E.G
  • *It is necessary to remember...*
  • *This might possibly be because...*

2. Prefer simple words. Bigger words don’t make your writing more academic.
For example, what could you write instead of...

a large majority of due to the fact that
has the capacity to in the event that
whether or not a new initiative
are in agreement
prior to
subsequent to
at this point in time
The simple version!

a large majority of most
has the capacity to can
whether or not whether
are in agreement agree
prior to before
subsequent to after
at this point in time now
• due to the fact that

• in the event that

• a new initiative

because

if

an initiative
Do NOT inflate your sentence length and complexity to sound academic!

Example:

_Epigenetic events contribute to the etiology of diabetes; however, the lack of epigenomic analysis has limited the elucidation of the mechanistic basis for this link._

Can you simplify this?
How about?

• **How do epigenetic problems cause diabetes?**

• You can find many more examples of overly complex sentences on the excellent Duke University site:  
  
  https://cgi.duke.edu/web/sciwriting/index.php?action=lesson3#examples
Academic Writing is Precise

• Which of the following terms can you use in your academic writing?
  • People
  • Scientists
  • Researchers
  • Research
  • The literature
E. G. Be precise when referring to previous work to establish what is already known

- Recent evidence suggests that...
  Extensive research has shown that...
Studies of X show the importance of...
It has previously been observed that...
Several attempts have been made to...
Previous research has established that...
Data from several studies suggest that...
Previous research comparing X and Y has found...
The existing body of research on X suggests that...
There is a growing body of literature that recognises...
Several theories on the origin of X have been proposed
• The previous examples were taken from the excellent resource:

• The Manchester Phrasebank

http://www.phrasebank.manchester.ac.uk/introducing-work/
Academic writing is clear

• Tutors often complain that writing is ‘unclear’

• International students often worry about their grammar and vocabulary, but this is usually not the main issue in making sure your message can be understood.

• Writing styles are culturally variable. This means there is a possible mismatch between your own expectations of academic writing and those of academic readers in the UK.
British and Chinese Academic Writing

Jin and Cortazzi (1996) – a study of academic culture in Britain and China

The research data reveal that many Chinese students use Chinese discourse patterns when they write in English. This causes some difficulty for British tutors who sometimes cannot identify the student’s writing problems. At the same time, these students see their writing as unacceptable to their tutors but do not understand the reasons. Unfortunately they often blame their language skills for what may be a problem of discourse and academic culture. Furthermore, those who are aware of such differences may not be willing to change, since they cannot see anything wrong with their own discourse patterns.

Jin and Cortazzi (1996: 210-211)
In order to make your writing clear, you need to focus on:

- Explicitness
- Logical flow
- Cohesion
- Text structure
Being clear 1: Explicitness

One aspect of reader-responsible writing that may cause difficulties for British readers is what they may perceive as a lack of explicitness. Here are two more comments by British lecturers on Chinese students’ writing:

T: [Chinese students] have difficulty in expressing the point, they only give half of it, they don’t fully explain things, that’s the most common thing. . . .

[...]

T: They’ve got to be precise and technical . . . And the problem is, it’s not only the technical things that must be precise, the equations and things like that, but it’s also the fact that there must not be inferences . . .

Jin and Cortazzi 1996: 211-212 (emphases added)
Example: where to put the **main point**

(Interview data)

*T:* ... the style we encourage: [the] main point at the beginning, then try to build up a paragraph, later to prove the main point or hypothesis, then give a summary or conclusion at the end.

*CS:* ... The Chinese style of writing is constructed with reasons and feelings. The conclusion comes from step-by-step reasoning. From Confucius’ time, we have been told we must present a source and origin, otherwise the reasoning must be made clearly. There is no present without the past. Therefore we should report from the root.[…]

*T:* Chinese students tend to give the main point at the end of the paragraph, while British students tend to give it at the beginning, the first sentence of the paragraph.

Jin and Cortazzi (1996: 211)
• Explain all links between ideas clearly. Be specific about reasons. Make careful use of appropriate linking words and phrases.

• Write down each stage in your reasoning as clearly as possible. Don’t rely on implication or suggestion – these may not be understood.

• Use concrete, practical examples to illustrate general or abstract points. If you don’t, your ideas may seem too vague.

• Remember that it is more important to be clear than to use impressive language. In academic writing your task is to present clear arguments and report information accurately; your work will not be assessed on its artistic merit!
Paragraphing
Follow conventional paragraph patterns

• Must every paragraph have a ‘topic sentence’?
Must every paragraph have a ‘topic sentence’?

• Because you start a new paragraph when you move on to a new (sub)topic / point, you need to make the change of topic clear to your reader.

• An effective way to do this is to begin the new paragraph with a sentence announcing the new topic / point.
Productive and receptive control of routine formulae is highly beneficial to L2 learners. First and foremost, it eases communication with other language users. Use of an expression like ‘Do you have the time?’ is immediately comprehensible to an interlocutor as a request for the current time, whereas ‘Declare the hour and the minute, please’ is not. Furthermore, knowing how to express meanings quickly and efficiently and knowing what other people will say in certain situations reduces processing load, which is an important advantage, particularly to learners at lower levels of proficiency for whom routine formulae can constitute ‘islands of reliability’ (House op.cit.). Finally, target-like use of routine formulae makes it easier for learners to ‘fit in’ (as Wong-Fillmore op.cit. showed) at least to the degree that they choose to do so.
Being clear 3

Cohesion
Which of these two texts is more cohesive?

Text A
Attracting customers to buy your products and services needs a great deal of research and planning to ensure the money you invest in gaining customers pays off. This is normally achieved through market research and involves finding more about the people you hope to sell to. Armed with this information you can then formulate an effective plan of action based on your evidence. Once you are aware of the needs of your potential customers you need to examine your product in detail, fix a suitable price which will help your product sell, ensure you choose the correct method of distribution and select an appropriate promotion to attract your audience. This is known as the marketing mix and can help your business to spend money wisely with the best results.

Text B
Attracting customers to buy your products and services needs a great deal of research and planning to ensure the money you invest in gaining customers pays off. Firstly, there is market research and involves finding more about the people you hope to sell to. Secondly, formulate an effective plan of action based on your fix a suitable price which will help your product sell, ensure you choose the correct method of distribution and select an appropriate promotion to attract your audience. So this is known as the marketing mix and in summary it can help your business to spend money wisely with the best results.
Which of these two texts is more cohesive?

**Text A**
Attracting customers to buy your *products* and services needs a great deal of *research* and planning to ensure the money you invest in gaining customers pays off. This is normally achieved through *market research* and involves finding more about the people you hope to sell to. Armed with *this* information you can then formulate an effective plan of action based on your evidence. Once you are aware of the needs of your potential customers you need to examine your *product* in detail, fix a suitable price which will help your *product* sell, ensure you choose the correct method of distribution and select an appropriate promotion to attract your audience. *This* is known as the marketing mix and can help your business to spend money wisely with the best results.

**Text B**
Attracting customers to buy your products and services needs a great deal of research and planning to ensure the money you invest in gaining customers pays off. *Firstly*, there is market research and involves finding more about the people you hope to sell to. *Secondly*, formulate an effective plan of action based on your fix a suitable price which will help your product sell, ensure you choose the correct method of distribution and select an appropriate promotion to attract your audience. *So* this is known as the marketing mix and *in summary* it can help your business to spend money wisely with the best results.
Be careful of

• overusing the cohesive devices some of you learned for IELTS
( nowadays, moreover, furthermore, firstly, secondly )

• Instead, you can use the following devices to make your text more cohesive.
Repetition

Patients who repeatedly take overdoses pose considerable management difficulties. The problem-orientated approach is not usually effective with such patients. When a patient seems to be developing a pattern of chronic repeats, it is recommended that all staff engaged in his or her care meet to reconstruct each attempt in order to determine whether there appears to be a motive common to each act.

4) Here we show that the annual flux of carbon from deforestation and abandonment of agricultural lands in the Brazilian Amazon was a source of about 0.2 Pg C yr\(^{-1}\) over the period 1989–1998 (1 Pg is 10\(^{15}\) g). This e_________ is based on annual rates of deforestation and spatially detailed estimates of deforestation, regrowing
Being clear 4

Information Flow
What is information flow?

Another important consideration for successful communication is flow – moving from one statement in a text to the next. Naturally, establishing a clear connection of ideas is important to help your reader follow the text.

Swales and Feak (2004) Academic Writing for Graduate Students
Sentences

Most sentences in English have two parts:

• a **topic** (theme) – what the sentence is about
• a **comment** (rHEME) – what the writer/speaker wants to tell you about the topic
sentences

question: Where is Anton?

answer: Anton’s at the cinema.

Theme Rheme
In English sentences, old information usually comes before new information.

**topic**

old information

**comment**

new information
Sentences

• The **theme** is what you are writing about - it is *old* or *known* or *given* information.

• The **rHEME** is what you are saying about the **theme** - it is *new* information, what you want to tell your reader.
Task 1

Identify the theme (topic) and rheme (comment):

• 1. The M8 goes from Edinburgh to Glasgow.
• 2. The motorway from Edinburgh to Glasgow is called the M8.
Solution

Identify the **theme** (topic) and **rHEME** (comment):

1. The **M8** goes from Edinburgh to Glasgow.
2. The motorway from Edinburgh to Glasgow is called the **M8**.
Epigenetics

Epigenetics is the study of heritable changes in gene function that do not involve changes in the DNA sequence. The Greek prefix epi- in epigenetics implies features that are "on top of" or "in addition to" the traditional genetic basis for inheritance. Epigenetics most often denotes changes in a chromosome that affect gene activity and expression. It can also be used to describe any heritable phenotypic change that does not derive from a modification of the genome, such as prions.
Choice 1

Epigenetics => is the study of...

The Greek prefix epi....

Epigenetics

It (epigenetics)
Mary Wollstonecraft

The early feminist movement was greatly influenced by works like "On the Vindication of the Rights of Women" (1792) by Mary Wollstonecraft. She proposed a feminist agenda whose aims were to expose the exclusion of women from traditionally "male" spheres like politics, economics, education and religion, to take apart these structures, which denied women their deserved rights and attempt to achieve these rights for them in the male dominated spheres. These aims became a main focus for religious women in particular, at the time, in the United States. 

(McCabe, 2009)
Choice 2

Early feminist movement => Mary Wollstonecraft

She => feminist agenda (aims)

These aims => focus for religious women
Problem text

To stop the outbreak of the unknown disease, two medical teams were sent immediately to the affected area in Sichuan to diagnose the disease. Ten doctors selected from the first-rate hospitals across the country formed each medical team. The expertise of all the doctors was well-known in China, and some was world-famous.
Being Clear 3: Use Explicit Transition

• English is a **writer- responsible language**.

• This means it is **your** job to make your meaning clear.

• This means you need to provide explicit transition
  • *between ideas within paragraphs* and
  • *between each paragraph*. 
Avoid however, nowadays

• Put the verb as close to the subject as possible.

In order for your message to be clear,
Avoid ‘bamboo sentences’.

This advice is from J. Strunk’s

(see under Rule 3).
Avoid ‘bamboo sentences’

• An unskilful writer will sometimes construct a whole paragraph of sentences of this kind, using as connectives and, but, and less frequently, who, which, when, where, and while.

I went to the cinema and I bought a ticket and then I bought some popcorn and went in because it was raining.

When I was around nine or ten I wrote a play which was directed by a young, white schoolteacher, a woman, who then took an interest in me, and gave me books to read, and, in order to corroborate my theatrical bent, decided to take me to see what she somewhat tactlessly referred to as ‘real’ plays.

learn to use: Although; while; whereas; despite the fact that; even though
Other issues that impede clarity

• Get to the main verb early: avoid long introductory phrases and clauses.

• Avoid long abstract subjects.

• Avoid interrupting the subject-verb connection.
If your tutor says...

1. ‘You’re not developing your points enough’
   • Look at your paragraph structure. Have you too many points in each paragraph. Think ‘one paragraph= one point’

2. ‘You need more evidence’

Make sure that you provide at least one source in each paragraph, or your writing could be to anecdotal.
And finally… demeaning adverbs

• Be careful of demeaning words like "obviously", "clearly", or "undoubtedly." Something that is obvious to you may not be obvious to the reader.
Any Questions?
Summary

• Academic writing is concise and precise.

• In order to be clear:
  ➢ Paragraph appropriately.
  ➢ Be explicit with your reasoning.
  ➢ Use all cohesive devices, not just linking words.
  ➢ Remember to think about logical flow. Don’t let your subjects jump around.
  ➢ Keep your verb as close as possible to your subject.
