- Non-technical forces will play a role in shaping what you can achieve.
- To understand some of these forces may be helpful.

Cloud use questioned over PRISM leaks

The rise of cloud computing – with millions of people storing data on servers in the United States – enabled vast amounts of personal data to be collected by the U.S. National Security Agency's PRISM programme

(TS//SI//NF) Introduction

U.S. as World's Telecommunications Backbone

- Much of the world's communications flow through the U.S.
- A target's phone call, e-mail or chat will take the **cheapest** path, **not the physically most direct** path – you can't always predict the path.
- Your target's communications could easily be flowing into and through the U.S.
