By BRAD STONE
Published: July 17, 2009

In George Orwell's "1984," government censors erase all traces of news articles embarrassing to Big Brother by sending them down an incineration chute called the "memory hole."

On Friday, it was "1984" and another Orwell book, "Animal Farm," that were dropped down the memory hole — by Amazon.com.

In a move that angered customers and generated waves of online pique, Amazon remotely deleted some digital editions of the books from the Kindle devices of readers who had bought them.

An Amazon spokesman, Drew Herdener, said in an e-mail message that the books were

Mimicking Object Agency

"Spimes are manufactured objects whose informational support is so overwhelmingly extensive and rich that they are regarded as material instantiations of an immaterial system. Spimes begin and end as data. They're virtual objects first and actual objects second."
Bruce Sterling, Shaping Things, (2005)

Bleecker says there are three key characteristics of a blogject:

1. Blogjects track and trace where they are and where they've been;

2. Blogjects have self-contained (embedded) histories of their encounters and experiences

3. Blogjects always have some form of agency — they can foment action and participate; they have an assertive voice within the social web.
