

# Software Design and Modelling

## Lab Assessment Instructions

1. The assessment lasts 75 minutes.
2. Log into your computer as soon as you are ready to do so.
3. Start Papyrus, by typing `papyrus` in a terminal.
4. To download the question paper and auxiliary files, type the following in the terminal window:

```
getpapers
```

This will create a subdirectory `sdm-1a` in your home directory, containing two further subdirectories, `papers` and `templates`. The question paper itself will be in `papers`. Any auxiliary files will be in `templates`.

**Do nothing further until the start of the assessment is announced!**

5. When the start of the assessment is announced, go to the directory `sdm-1a/papers` and open the question paper `paper.pdf` with the standard PDF viewer. **Important:** the directory `sdm-1a/papers` is read-only, so you cannot save your work in this directory. If you choose, you can save your work in the `sdm-1a/templates`; however, this is entirely optional.
6. Submit your answers using the command

```
examsubmit FileName.java
```

where *FileName.java* is the name of the file to submit. You will need to repeat this command for each of the required files. If you get an error, please check carefully that you are using the filenames required in the exam paper and that you are in the same directory as the file.

In some cases you may need to first go to the directory in which Eclipse stored your files. This will probably be the directory `HOME/workspace/PROJ/src`, where *HOME* is your home directory and *PROJ* is the name of the project you created when you started your Eclipse session.

If you continue to have problems, please contact one of the invigilators.

Repeated submit commands are allowed, and will overwrite previous submissions. The last file submitted will be the one marked.

7. Various documentation, and instructions on how to do certain checks of your work, is available by pointing your browser at:

`file:///group/examreadonly/sdm/`

*(Note that internet access has been disabled.)*

8. When the end of the assessment is announced, you must submit and log out immediately.
