

challenge

Are you ready
to face a new
challenge every day?

Welcome to the
Procter and
Gamble SEOC
presentation

P&G

Welcome to the P&G presentation

Maria Navrotskaya (Information Decision Solutions)

University of Edinburgh 2004 - 2008

- MA (with Hons) in Economics and Mathematics
- Did an internship in P&G in summer 2007

Procter & Gamble 2008 - present

- >3 years with Procter and Gamble
- Work in Newcastle
- I help transform Financial Solutions

Welcome to the P&G presentation

Thomas Poundall (Information Decision Solutions)

University of Strathclyde 2005 - 2009

- BSc (Joint Honours) in Management Science & Computer Science
- Did an internship in P&G in summer 2008

Procter & Gamble 2009 - present

- >2 years with Procter and Gamble
- Work in Newcastle
- I work globally to transform all of P&G's financial transactions

What did I want from a career?

Responsibility

**Big, global
company**

**Business &
Technology
mix**

Good training

**Something
different**

WHO ARE P&G

*INTRODUCTION TO
THE CASE STUDY*

WHY SEOC?

How many brands with sales over \$1 Billion are in the P&G portfolio?

23

23 brands with sales over \$1 Billion

P&G A NEW CHALLENGE

Where does P&G get its leaders?

A

Build from within

We train and develop for the top jobs...
P&G places strong emphasis and reward on
training, mentoring and coaching

The world's leading brand building company

P&G interns

P&G A NEW CHALLENGE

So what actually do we do in
IDS...

Everything 😊

And the value added of **IDS** is...

Everywhere ☺

We are the Change Agents for P&G

- **We Anticipate, Lead & Deliver** business process changes.
- Across functions: Customer Business Development, Marketing, Product Supply, R&D etc
- Geographies
- Technologies.

We Drive Change to transform a \$80bn business

Innovative, Strategic thinkers

Passion for business and technology

THE CASE STUDY

P&G A NEW CHALLENGE

Remember this..

Focus of the case study

Real Problem

- Getting the right stock to the right stores at the right time is real challenge.
 - Costs money to make
 - Costs money to ship
 - Costs money to store
 - Costs money to destroy if not sold
 - Costs money (and credibility) if shelves are empty!
- Size of the prize ~ \$8 Bn (that's the UK alone)

So what's the situation?

- **P&G have released requirements to the open market and invited responses (SCLS.pdf)**

- I represent P&G
- SEOC is a software company
- Dr. Felici is the overall Project Manager & CEO
- Your tutorial groups are individual software development teams
- Purpose is to prove you understand the requirements and, if awarded the contract you will deliver a quality piece of software.

- **Use all the tools available to you to get the complete picture**

- Create a “proof of concept” which will provide the backbone for the finished application
- In the end I have to have confidence all the elements will work together so you [ALL] will be awarded the contract.

WHY SEOC?

P&G A NEW CHALLENGE

Today's reality...

- IT is increasingly a commodity for most large companies
- Businesses still need technology experts to:
 - Realise the value of IT systems
 - Be the expert as to how and why our solutions deliver maximum value
 - Set IT strategy and manage IT projects
- “Generic” skills you learn in SEOC can be reapplied again & again.

How does SEOC help?

- Requirements gathering:
 - The ability to communicate with people and understand what they really need
 - The ability to separate “nice to have” vs “critical” requirements.
- UML – use cases, state diagrams etc
 - The ability to understand and map processes by understanding and communicating through diagrams
 - The ability to break complex problems into smaller chunks – helps you find the root of the problem & prioritise.
 - Helps you see the bigger picture and identify outages & helps you see the “what if” before you experience it
- System Design and Architecture
 - The ability to visualise how systems work, get an instinctive feel for what issues you might face / where to look if they do

In this particular exercise ...

To succeed you need to:

- Work together in your own teams and work with “external” teams
- Use tools to help you map and explain processes
- Think about optimal, but realistic solutions
- Manage your time, resources & scope (which is almost the definition of Project Management)

Real Value

- On a small academic project, it can seem like more overhead than work
- Sometimes the balance feels wrong
- On real projects, these are the things that save you
- Being great at project management makes you great at delivering things → superstar!

BTW

You will use the skills and tools...

I'm going to show you a really quick example of a project I worked on recently..

The idea

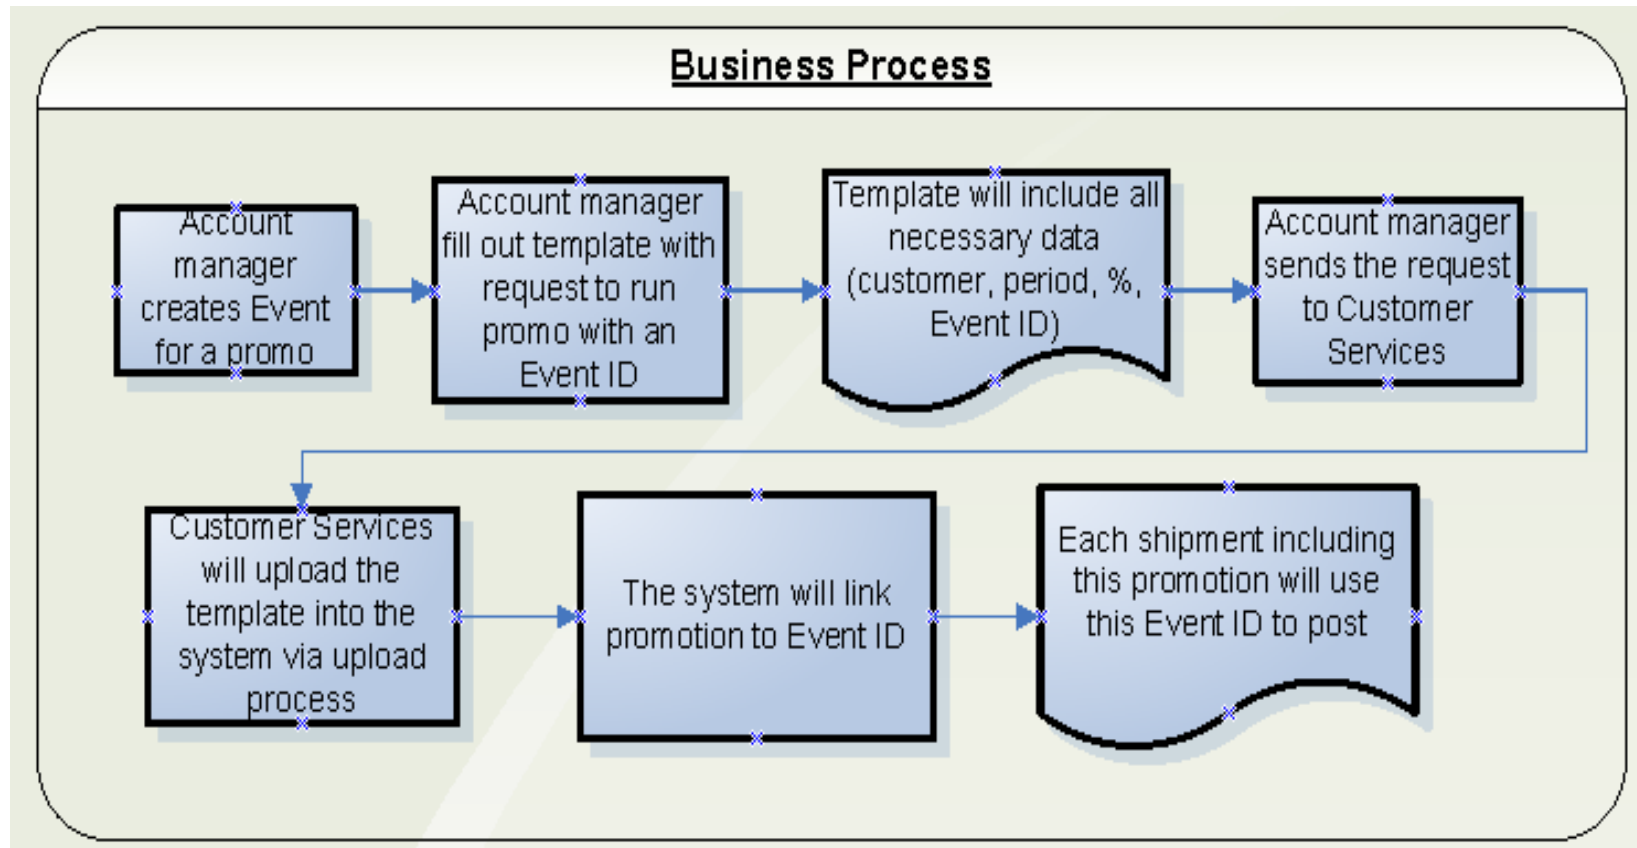

Questions

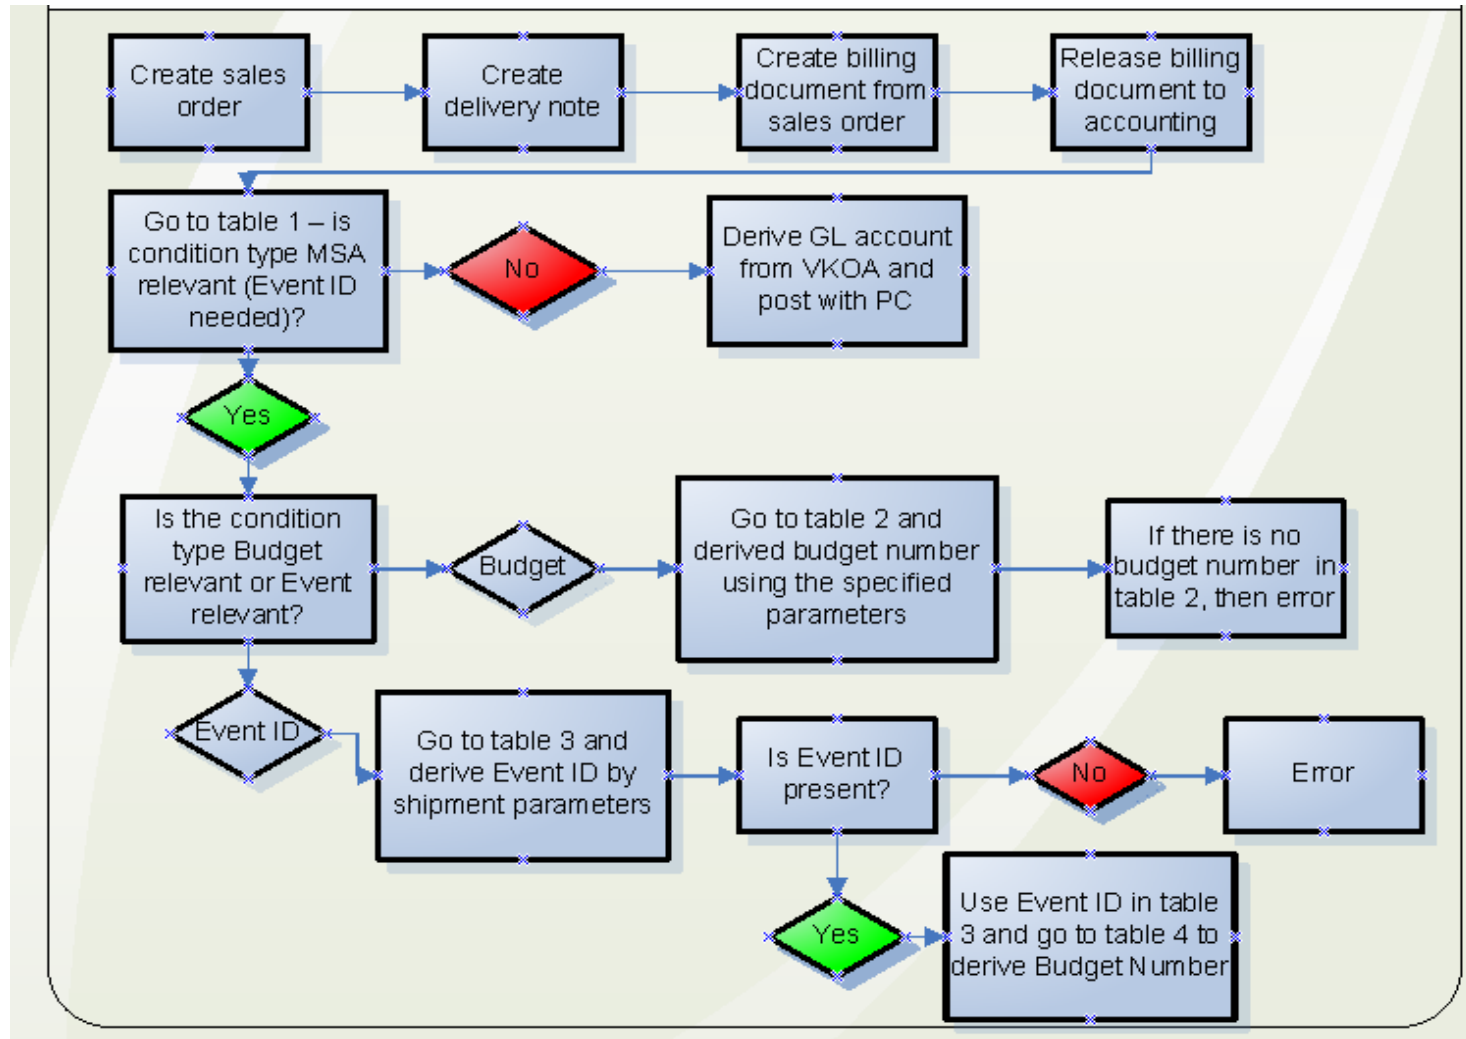

- How do we track a particular event/promotion in the system?
- Who will need to be involved to provide the data?
- How will the data be entered in the system?
- What is the process that will be followed? And what is the logical flow in the system?

Visio is my best friend...

And again...

How do I use process diagrams?

- I use system logic diagrams to communicate with the developer to ensure they understand what the requirements are in technical speak.
- Therefore, I need to consider every eventuality – what errors can happen? What can go wrong?
- I use process diagrams to talk to my users to explain what process they will need to follow.
- I need to consider what different teams need to work together and how to ensure that we get the correct data.

What is next?

- Development
- Technical Testing
- Key user Testing
- Go Live

FYI

- This is just an example of how I still use skills
 - You don't necessarily need to go into this level of detail
 - You have to decide the right level for your project
 - Ask your lecturer and tutor and decide in your group what is the right level for this project.

Internships

Most 10-12 wks long over the summer

10 to 12 positions available in the UK

Real responsibility from Day 1 as an intern

Apply **as soon as possible !**

IDS Challenge

1 week, in Dubai

Students from Africa,
Middle East & WE

Apply as soon as possible !

Fabienne from Switzerland and Taruj from UAE
— participants of IDS Challenge 2011

READY FOR AN UNFORGETTABLE EXPERIENCE?

Sign up for our FREE ONE-WEEK SEMINAR and you'll see business and information technology in a whole new light!

International
IDS Challenge
Dubai 2012
Meet. Discover. Transform.

Dubai
22-27 April, 2012
APPLY NOW!
www.facebook.com/idschallenge
(deadline 13 February, 2012)

A NEW CHALLENGE EVERY DAY.™
Daily. Globally. Personally. Professionally.

1 Year Placement

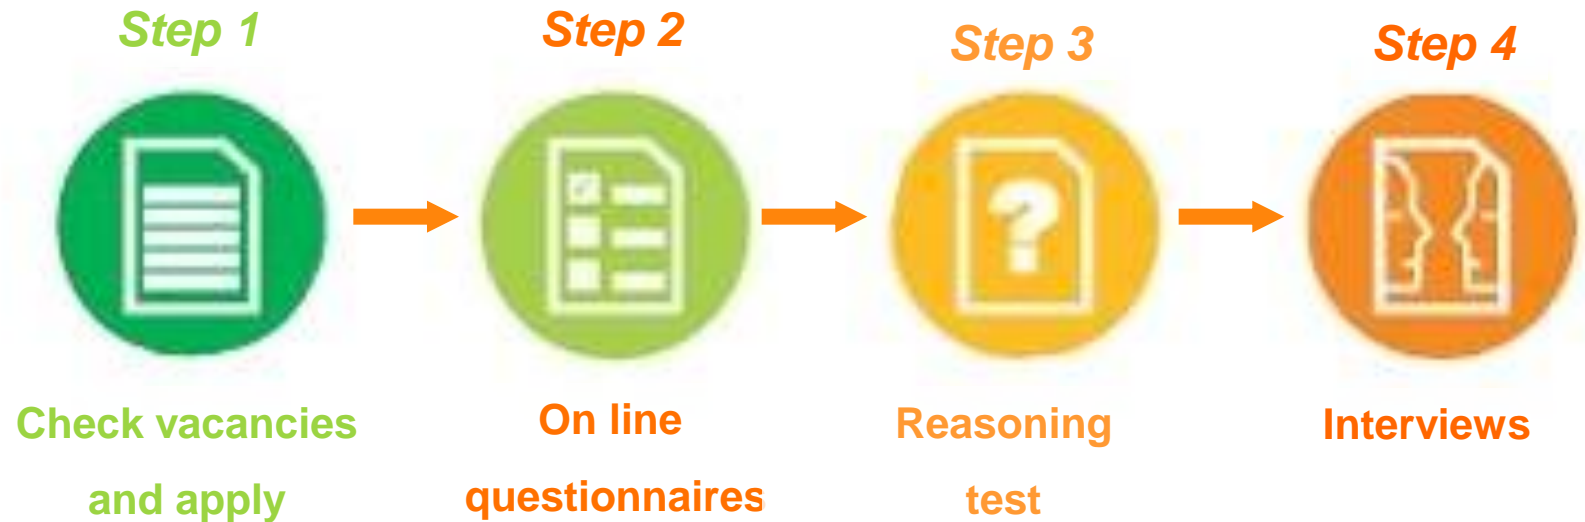

Starting July 2012

4 placements available in the UK

Deadline is April 2012

Our Application Process

Thank you
